Visualization 2

Top 10 types of disembursments are shown it the chart. Blue circles represent the amount per year per category.
1) This visualization clearly shows us the trends of the countries based on top 10 purposes over-time.
2) The purposes are arranged in descending order (ex: air transport has the highest amount and so on.)
On the X axis we have time(year) and on the Y axis we have categories of disembursment.

■ Amount of disembursment per category per year in Billions USD

Visualization 3:

Visualization 3

Here The visualizations are distributed in the groups of 10 years. These 4 graphs show us the geagraphical view of the countries that receive donations.
It helps us see whether the countries tend to cluster.
The darker shades of orange show that donation is more than the countries with lighter shades of orange
The countries in Red receive highest donations

Year: 1970-1980

Year: 1980-1990

Year: 1990-2000

Year: 2000-2010
